

Welcome to 5th Grade!

"Why fit in when you were born to stand out?" – Dr. Seuss

5th Grader,

We are so excited to have you join us on this wonderful adventure! This year you will be learning some amazing things in math, history, science, and English language arts. In math we are focusing

on multiplying and dividing whole numbers, fractions, and decimals. History this year is all about United States history and how our nation was founded. In science we cover a wide range of topics including electricity, magnetism, earth movements, genetics, and matter. A part of the fifth grade core is diving deeper into our writing and reading skills. Fifth grade is a wonderful time where you are the oldest in the younger grades and getting ready to enter middle school! We look forward to teaching you this year and hope you look forward to school!

From,

The Fifth Grade Team
